

Climate Chambers

Always an eye on
long-term stability

Constant climate chamber
HPP

Features

On-going stability tests, material tests, light module, energy-saving Peltier

Humidity chamber
HCP

Features

Perfect environment simulation; active humidity control

Climate chamber ICH

Features

Stability test in accordance with ICH. Pharmaceuticals, food, cosmetics, photostability

Environmental chambers
CTC / TTC

Features

Quick temperature changes.
Controlled material testing.
Automotive to Electronics.

Water and Oil Baths

Maximum safety in the lab

Waterbath

WNB / WNE / WPE

Features

2 control classes. Optimum temperature distribution. Peltier-Cooling unit.

Oilbath

ONE

Features

Thermal safety in the lab. Optimum temperature distribution. State-of-the-Art control.
